<b>Priority</b>	Medium

## Description

The application allows uploading empty files (0kb). Instead of showing an error message, the file is uploaded and a success message is displayed.

## Steps to reproduce

- > Go to the File Upload page
- > Click on «Choose file»
- > Select an empty file (e.g., file.txt, 0kb)
- > Click on «Upload»
- > Observe the success message “File uploaded”

## Expected result

1. After choosing a file, the file name is displayed next to the button.
2. After clicking «Upload», an “Internal server error” message is displayed.

## Actual result

1. File name is displayed after selection.

2. After clicking «Upload», the file is uploaded.
3. A success message «File Uploaded!» is displayed.
