Operating System	Tahoe 26.1, 25B78
Browser	Chrome 144.0.7559.59
Severity	Major
Assigned to	/
Priority	Medium

Description

The application allows uploading files with unsupported extensions by Choose file and Drag&Drop. Instead of showing an error message, the file is uploaded and a success message is displayed.

Steps to reproduce

- > Go to the File Upload page
- Either:
- > Click on «Choose file»
- > Select a file with unsupported extension (e.g., file.invalid)
- > Click on «Upload»
- > Observe the success message “File uploaded”
- Either:
- > Drag and drop a file into the upload area
- > Click on «Upload»
- > Observe the success message “File uploaded”

Expected result

1. After choosing a file, the file name is displayed next to the button;
After drag and drop a file, file's name is displayed in the box.
2. After clicking «Upload», an “Internal server error” message is displayed.

Actual result

1. File name is displayed after selection.
2. After clicking «Upload», the file is uploaded.
3. A success message «File Uploaded!» is displayed.
