Priority	High

Description
The drag & drop upload functionality allows users to select one or multiple files, but the backend fails to process them, resulting in a server error. Users cannot complete the file upload process.

Steps to reproduce
> Go to the File Upload page
> Drag and drop a file into the upload area
> Click on «Upload»
> Observe the error message "Internal server error"

Expected result
1. After drag and drop a file, file's name is displayed in the box.
2. After clicking on «Upload» button, file is uploaded and a success message «File Uploaded!» is displayed.

Actual result
1. After drag and drop a file, file's name is displayed in the box.

2. After clicking "Upload", an "Internal server error" message is displayed.
